Winter protection that works beautifully

Allied 39

TOP QUALITY CRAFTSMANSHIP USING THE LATEST MATERIALS

The highest quality construction and materials go into every Fairclough project. All frames are crafted from 1" galvanized tubing, reinforced at all stress points, and joined together with special solid cast aluminum connectors.

Our covers can be adapted to accommodate mast and rigging as well as docklines and fenders.

For over 70 years, Fairclough has been a family-owned company dedicated to making the finest cruising sails and custom marine canvas for boat owners. Through continued innovation and improvement, we've developed the finest winter storage products available today **Fairclough Custom Boat Frames and Covers**. As the originators of this system, we've often been copied, but for protection, beauty, workmanship, and long-lasting value, we've never been duplicated.

Frames & covers

SAFEGUARDING YOUR BOAT AND INVESTMENT

Whether your boat is stored in or out of the water, no other cover shields it so effectively from ice and snow, sea salt and the effects of pollution. Fairclough covers prevent costly repairs due to fading Gelcoat or damaged brightwork, while adding years of life and enjoyment.

BENEFITS AND VALUE NO OTHER COVER CAN TOP.

- Aerodynamic "cocoon" shape resists winter winds
 - Zippered door for easy access
 - Can be fitted to accommodate rigging
 - Vented for mildew resistance
 - Fast, easy installation
 - Made to last for years and years
- Our covers are often still in use after more than 10 years!

CHEAPER COVERS CAN COST YOU PLENTY...

- Often last only one year
- Provide no doorway
- Don't fit around rigging
- Are prone to tearing or blowing off
- Create a "greenhouse effect" and promote mildew
- Create waste and are environmentally unsound
